## Early July Training Opportunities

There are a couple of training opportunities scheduled for July 1st and 2nd that might not be seen in time for those interested to participate in them if they first appeared the July "Happenings" Newsletter.

### USCCA Defensive Shooting Fundamentals, July 1

Taught by [Natalie Bohon](#) (link to instructor page with contact information, etc.). **Friday, July 1, 6pm-9pm.** This class is perfect for individuals ready to progress past their CCDW class. We will perform drills to develop defensive shooting skills on paper targets and rubber dummies. There is an e-learning module that the student is encouraged to complete before the class but it is not mandatory. This learning module is available to the student after the class, as well. THERE IS NOT A LOT OF MOVEMENT WITH THIS CLASS. Therefore, if your mobility is restricted, you would still be able to successfully complete this course.

### Intermediate Carbine Skills Drills, July 2

Taught by [Brian King](#) (link to instructor page with contact information, etc.). **Saturday, July 2, 9:00am-12:00pm.** Pick up where the June 4 Introductory Carbine Skills Drills left off. The Intermediate class is designed for the AR platform (this is not an NRA class) and is **not a beginner's class!** Please be comfortable with manipulations, moving with the rifle, and getting into various and sometimes difficult shooting positions. BGSL members have been asking for the Carbine Skills Drills to return for some time, so don't miss this opportunity to find out what the buzz was all about.
